MAIN FEATURES

In September 1978, weighted average minimum weekly wage rates increased by 98 cents to \$154.20 for adult males. The weekly rate for adult females increased by 23 cents to \$142.98.

Most of the increase is due to the incorporation of some overaward payments into the Metal Industry Award, Part 1, as supplementary payments; this has the effect of increasing the figure for adult males in the engineering, metals, vehicles, etc. industry by \$3.07 and the figure for all industries by 92 cents. Corresponding increases for adult females are \$2.25 and 22 cents. (See NOTE on page 2.)

EXPLANATORY NOTES

More information on these statistics of weighted average minimum weekly and hourly wage rates and index numbers for adult males and adult females will appear later in the monthly bulletin *Wage Rates* (6312.0) which also contains explanatory notes covering definitions, scope of the statistics, etc.

2. The wage rates used in the compilation of the indexes are the lowest rates for a full week's work (excluding overtime) prescribed for particular occupations in awards or determinations of Federal or State industrial authorities; in collective agreements registered with these authorities; or in unregistered collective agreements where these are dominant in

particular industries. The indexes are designed to measure movements in prescribed minimum rates of wages as distinct from salaries; those awards, etc. which relate solely or mainly to salary earners are therefore excluded. Because of delays in the receipt of notification of changes in wage rates as well as retrospective changes to rates, figures for the latest twelve months shown are subject to revision. As such revisions are made they are published in the normal monthly tables of this statement.

3. The indexes are designed to measure trends in wage rates in current awards, etc. excluding the effects of changes in the relative importance of industries, awards and occupations. The weighted average wage rates shown in these tables are therefore indexes expressed in money terms, and do not purport to be actual current averages. Similarly, neither these weighted average wage rates nor the corresponding index numbers measure the relative levels of average current wage rates as between States or industries.

4. For adult males the weekly wage rates exclude rural industry; in addition the hourly rates exclude shipping and stevedoring, for which data to compute hourly wages are not available. The weekly and hourly wage rates for adult females exclude rural industry, mining and quarrying and building and construction.

5. The annual changes shown in Tables 1, 2 and 3 measure the percentage change from the same month for the previous year. The percentages may fluctuate from month to month owing to the timing of significant award changes.

NOTE: The extent to which minimum rates of awards apply to payments by the Commonwealth or State governments in the metal industry depends on the relevant award. Minimum rates of awards apply to payments in the metal industry.
